The 900 Series High Performance Sliding Door, engineered to withstand Australia's harshest conditions with style

The cutting edge 900 Series High Performance Sliding Door represents the latest generation of architectural door development. Specifically engineered to deliver unrivalled performance and design flexibility, the 900 Series has also been designed with architectural styling in mind.

Experience the ultimate in high performance weathering, low air infiltration, commercial strength and unique AGS advanced tracking system. Tested to AS2047 it has been engineered to withstand Australia's harshest conditions including cyclonic regions, making it one of the forerunners in high performance doors on the market today.

The 900 Series High Performance Sliding Door can be coupled to Capral AGS Architectural Framing Systems allowing you to experience a flawless sight line with a sleek modern look through its innovative styling.

Features include:

Panel size up to 3000mm in height, up to 2500mm in width with a wide range of multi-stack options

Tested to meet cyclonic requirements

Double wheel roller hardware supports up to 250kg panel weights

Various locking options available including surface mounted locks and mortice-style deadlocks

Superior energy performance and enhanced thermal comfort

Able to support glass thickness ranging from 4mm single glazed through to 26mm double glazed

Internal security/fly screen options available

Compatible with Capral AGS Architectural Framing Systems and linear drainage systems for seamless indoor-outdoor flow.

- Maximum Panel Height: 3000mm
- Maximum Panel Width: 2500mm
- Maximum Panel Weight: 250kg
- Serviceability Wind Pressure: Up to 6000 Pa
- Ultimate Wind Pressure: Up to 10,000 Pa
- Water Penetration Resistance: Up to 700 Pa
- Acoustic Rating (tested up to): 37 Rw (standard configuration) 39 Rw (acoustic configuration)
- Energy Ratings: WERS ratings available from www.wers.net

900 Series complimented by a range of AGS systems

The 900 High Performance Sliding Door is backed with full technical detail, supporting and assisting architects and designers to accurately specify 900 Series products into project work.
